Education does not mean just to get a degree or diploma from a recognized college or university. Education is the tool that destroys the hidden demon of ignorance and gives shape to new ideas which are beneficial to the whole of mankind. Thus, true education broadens our outlook. In the modern era, man has developed a large number of things and he has got success in bringing so many new ideas in every walk of life. But new ideas, however glamorous, at the cost of morality and honesty, change only into negative factors. In the modern society, one can earn a lot with the so-called new tactics, devices and gadgets but one should not forget that at every turn of life one has to protect oneself from others who want to merge one's personality and identity in theirs through crafty machinations. If you are clever enough to be a shark to others, some others can prove sharks to you. So one can never claim to be living in a really educated society ! Contrarily one can say with authority that one is living in a world of base manipulations and falsehood. In such kind of society, to be successful is not necessarily to be kind or honest but what is the important thing is to become dishonest and all that it brings in its train. But is it commendable for us, to be called "educated" while possessing such wiles of the devil ?
